Note from Pastor....

A Word on Stewardship

Finally, when the bread is done baking and the smell fills the air, the little red hen asks, "Who will help me eat this fine bread? This time the chorus is quick to respond, "I will," said the pig. "I will," said the dog." "I will," said the cow." "No, you will not!" said Little Red Hen. At first, I thought my sainted aunt had fallen from grace. The Little Red Hen did not share? What kind of story is this? At four years old I was seeing things a little differently. It wasn't till a little later that I began to understand that people were created to be about some kind of work. Work itself is an extension of the creation process which began with God's creative nature and

continues in our own.

The lessons in the story are hard to forget. It seems to be more than just a children's story to be tucked away and forgotten. There is work to be done even if you do not see the successful product immediately. You are faced with the choice of working according to your ability or taking your leisure in the warm sunshine, wasting your time and ability for your own comfort. Time and again, The Little Red Hen asked the animals to participate in the work and they refused. Time and again, God asks us to be about furthering God's kingdom in the world. Time and again we are given the opportunity to demonstrate God's concern for each other. Time and again we are reminded that God will see the work through to the end and share the finished product (eternal life) with those who are faithful. However, if you do not help with the work, how can you expect to share in the victorious result of the mission? What is that work, that mission? Will you give your best to the mission of Christ?

Matthew 28:19-20 tells us, "Go therefore and make disciples of all the nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, teaching them to observe all things that I have commanded you; and lo, I am with you always, even to the end of the age."

Amen.

Who will help me bring in the kingdom? And all God's people said, "I will."

Pastor Michaele

Hawai'i Wildfires

Presbyterian Disaster Assistance (PDA) urges your support in response to the devastating wildfires in Hawai'i, which authorities are calling the deadliest natural disaster in state history. PDA has already released emergency grants to meet the urgent needs of the communities and to provide immediate care. The magnitude of this event will require the development of long-term projects and assistance, both for the physical and emotional long-lasting effects.

Years of recovery lie ahead, and your commitment will help PDA extend the hands of Christ. Will you stand in the "GAP" for the people affected by these catastrophic wildfires? — Give. Act. Pray.

GIVE: PDA's emergency response and specialization in long-term recovery is fueled by your generous gifts. Gifts can be made online at pcusa.org/hawaiifires, by phone at (800) 872-3283, or by check made payable to Presbyterian Church (U.S.A.) with "DR000165-Hawaii" written on the memo line and mailed to Presbyterian Church (U.S.A.), P.O. Box 643700, Pittsburgh, PA 15264-3700.

ACT: Assemble Gift of the Heart kits for survivors in the affected areas — hygiene kits and cleanup buckets are especially needed. For more information, go to pcusa.info/heart.

PRAY: Where do we go to even raise our prayers when our hale pule became a burnt victim to the ravages of the fire? Comfort us in our tears and carry our heavy hearts in our time of sorrow. Eventually Ke Akua, our energy will turn to rebuilding our homes, our businesses, our jobs, our lives. Walk with us during the long recovery that lies ahead. We will become frustrated by bureaucratic red tape and supply chain delays and price gouging. We will fume and shake our fists and we will cry even more tears. Yet, the journey will not be as overwhelming with you by our side.

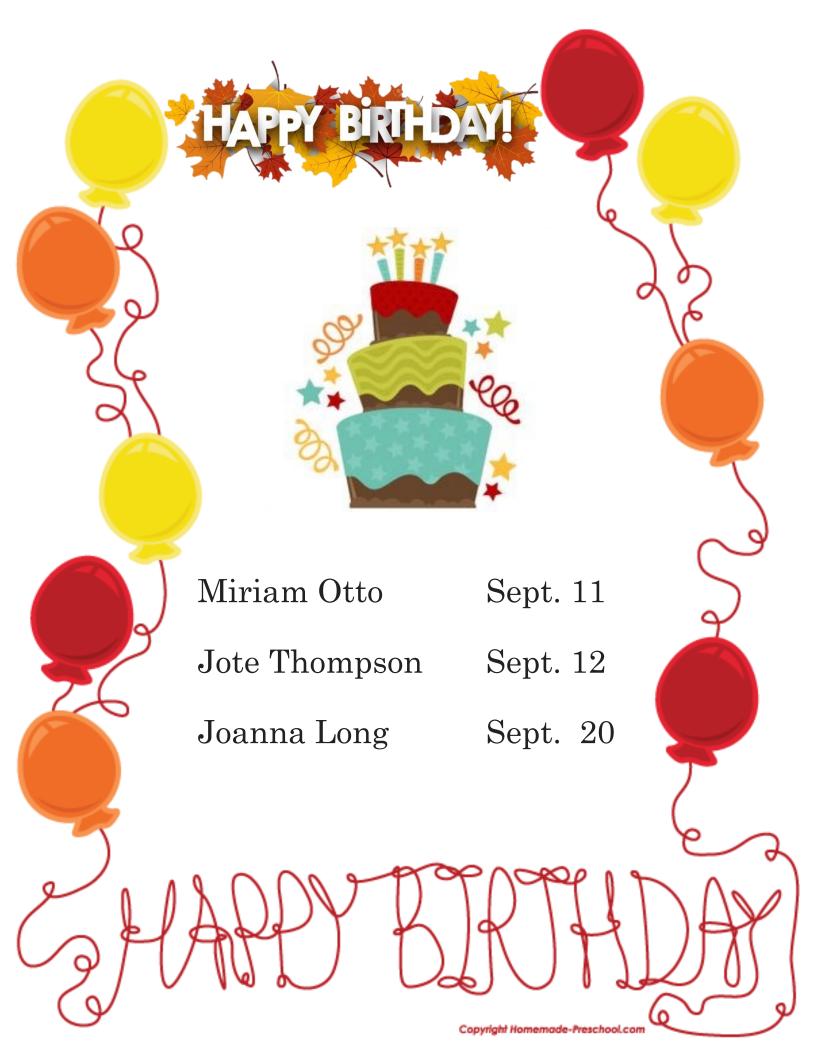

(prayer except from UCC Hawai'i Conference Minister the Rev. Dr. David K. Popham)

Dear KPC members and Friends,

In an effort to keep everyone up to date on how we as a church are doing financially, we are providing information to the monthly newsletter as well as the Sunday bulletins. This is to make sure everyone is informed on how we are doing as we strive to balance our budget. For some context, KPC was running with a balanced budget until 2019. With the challenges of being without a pastor for over a year and the pandemic starting shortly after Pastor Michaele came to KPC, we have been running a deficit the last four years. Our Finance Commission and Session are working to get us back on track after the pandemic. We greatly appreciate everyone's efforts and contributions as we strive to balance our budget.

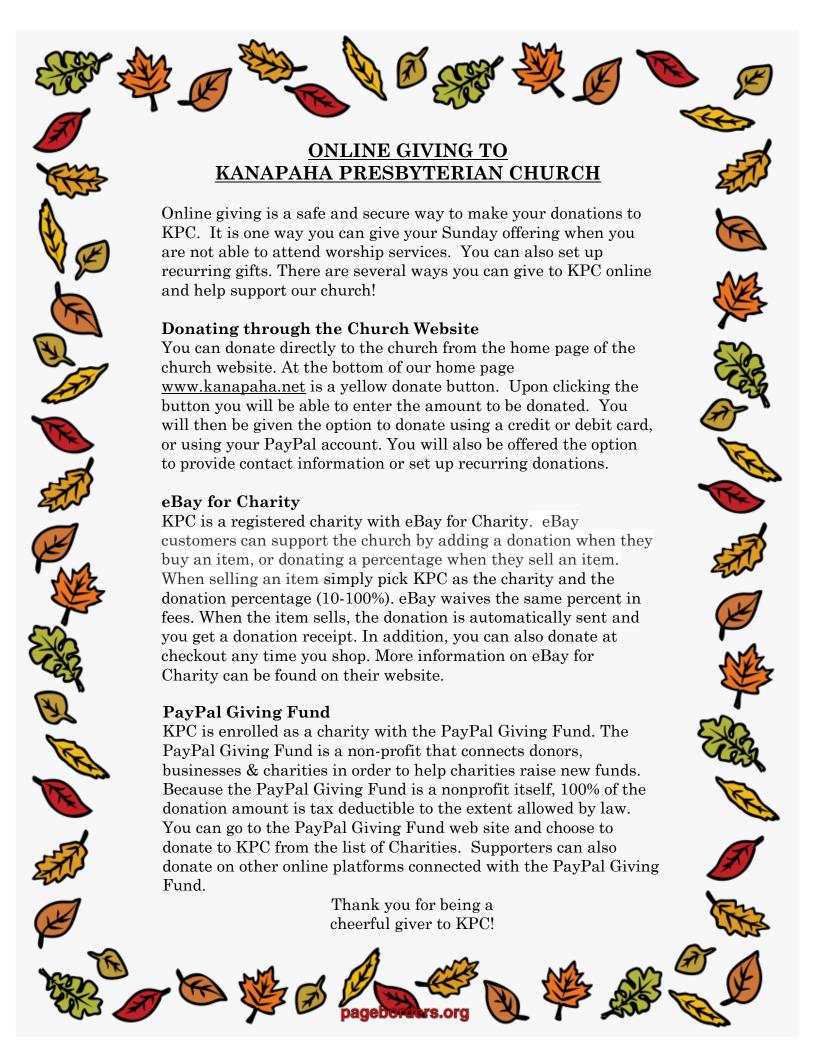

A church the size of KPC has many expenses that must be paid every month to keep us operating. In addition, we are making some much-needed capital expenditures to make sure our buildings and grounds are maintained. Each month we provide an update on our operating income, our operating expenses, and capital expenditures from the beginning of the year to the prior month. Some funds transferred from our PayPal account have led to updated numbers for January-April relative to what was in the newletter last month.

Month	Operating Income	Operating Expenses	Capital Expenditures	
January	\$7,885	\$11,975		
February	\$6,640	\$10,426	\$28,515 A DEY	
March	\$6,052	\$11,871	\$3,867	
April	\$10,946	\$10,260	CAPITAL	
May	\$6,217	\$11,134	EXPENSE	
June	\$6,608	\$11,192 OPERATING COSTS		
July	\$8.774	\$12.657		

We are only able to accomplish the many goals and missions of KPC through continued stewardship by our members and friends! These include those of you who we faithfully see every week, some who have joined the church triumphant, and friends who join us as visitors for a specific project or season of their lives. We note that as we come out of the pandemic, we are still meeting financial challenges with giving to our general operations fund well below what is needed to meet our expenses. We ask that you prayerfully consider whether you can increase your regular tithing to KPC so that we can continue to meet our financial obligations.

Cub Scouts Pack 371:

4 cub scouts participated in the council event at Camp Shands at the beginning of the month and enjoyed archery, BB guns and swimming. Pack 371 hosted 2 recruitment nights at local elementary schools and already have gained at least 10 new scouts for this school year.

Scouts BSA Troop 371:

This month, our awesome scout troop had a blast celebrating our Court of Honor! Our scouts received all the cool badges they

achieved on their fun summer camp. Now, we're all pumped up and ready for the next batch of exciting adventures in the next coming months.

This festival is the kick-off event for Welcoming Week 2023, a national celebration of culture, heritage and inclusivity in our community. Welcoming Week is an annual campaign that celebrates the work in communities to become welcoming places for all, including immigrants. Launched in 2012 by Welcoming America and its members, Welcoming Week provides individuals and organizations the opportunity to showcase their values through events and initiatives that foster connections and collaboration between immigrants and non-immigrants, as well as belonging for all.

Gainesville was the first city and Alachua County the first county in our state to become an official Welcoming City/County. Since that first significant step in 2015, we have been working as a community to become more inclusive and welcoming for all of our neighbors. This celebration will showcase our rich diversity, offer a safe space for fellowship and exchange, and allow our community to come together in unity and peace, all while having a great time! We will have food from 10-12 international chefs, music, dancing, artists and community resources such as health screening, employment assistance, and more!

The Funnies >>>

Fall Time Fun Facts >>>

1. FALL WAS ONCE CALLED "HARVEST."

The season once had a third name as well—in 12th- and 13th-century Middle English, fall was called "haerfest," which was the act of taking in crops. Eventually, it was known as "harvest" because the full moon closest to the autumn equinox is called the harvest moon.

2. WE LOVE PUMPKINS BECAUSE OF HOW THEY MAKE US FEEL—NOT HOW THEY TASTE.

Studies have shown that what we really love about pumpkins is the sense of nostalgia they make us feel. Pumpkins represent farm life and tradition, which is a romantic idea for many Americans, and one we're very attached to. Basically, we love the idea of pumpkins and the imagery surrounding them.

3. FALL COLORS DEPEND ON HOW MUCH SUGAR IS IN THE LEAVES.

Fall leaf colors are caused by certain pigments in the leaves, and different kinds of trees produce different pigments. When you notice leaves that are purple and red, that's caused by the "anthocyanins" pigment, which is only produced in the fall when sugars are trapped in the leaves. Lots of dry weather and sunlight will lead to more sugars in the leaves, meaning the leaves will be brighter red. Freezing, meanwhile, stops the process of making red pigments.

4. GLOBAL WARMING COULD RUIN FALL FOLIAGE.

Scientists believe that global warming is going to run fall foliage, and may have started already. Leaf colors are highly affected by temperature, light, and water supply. If the temperatures remain too warm, that delays the leaves from showing their natural colors.

5. BOBBING FOR APPLES WAS ONCE A BRITISH COURTING RITUAL.

Males were assigned an apple, and females would bob for them, trying to get the right apple from the man she wanted. If she did, it meant they were destined to be together.

6. LEAVES FALL BECAUSE OF A HORMONE.

As their exposure to light decreases in the fall, they start to produce a hormone that boosts the growth of a cell between the stem and the leaf. As that happens, the leaf is basically forced to fall off the stem. Even if this didn't happen, leaves would fall off the trees in the winter as they would freeze and die.

7. IT'S THE BEST TIME TO SEE THE AURORA BOREALIS.

The longer nights and cooler weather make fall "aurora season," according to NASA. Geomagnetic storms are about twice as frequent during the fall, creating the light show.

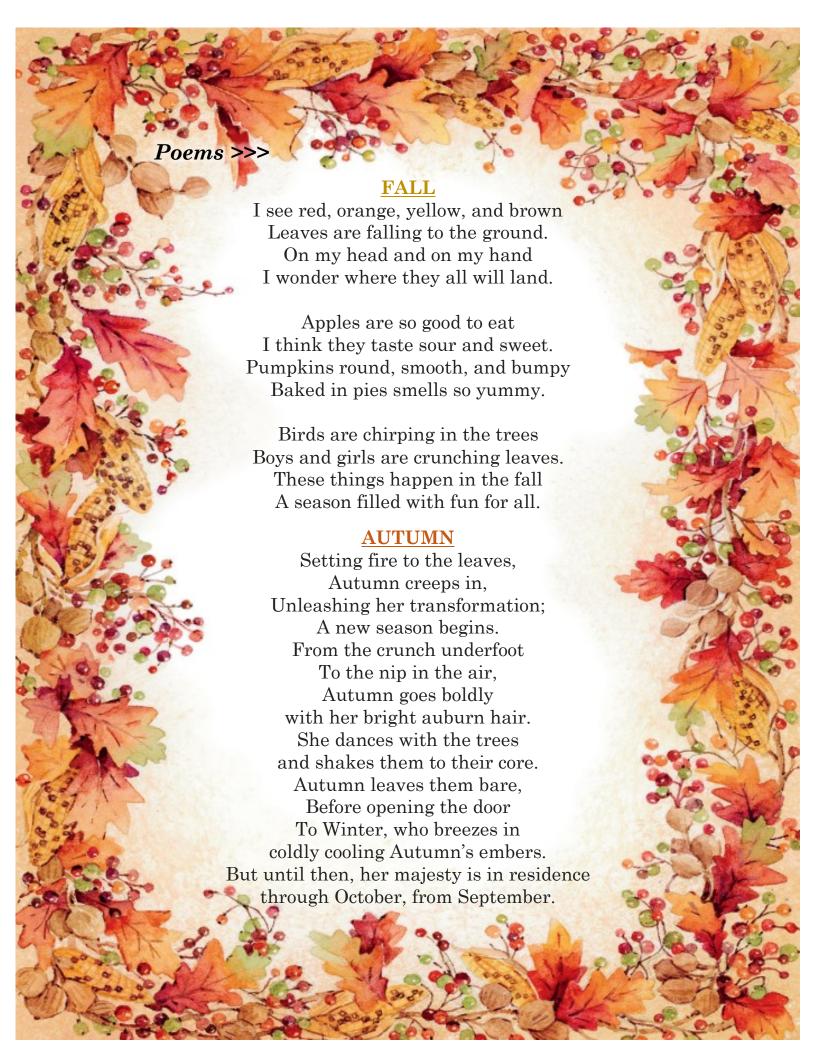

8. HEART ATTACK RATES DROP IN THE FALL.

The spring equinox that causes us lose an hour is the worst, but gaining an hour during the autumn equinox is actually good for us. According to the *New England Journal of Medicine*, the rate of heart attacks for Americans is known to fall on the Monday following the end of daylight savings time.

9. YOU NEED A LOT OF APPLES TO MAKE APPLE CIDER.

Apple cider is nearly as popular as pumpkin spice during the fall.

But keeping up with the demand for fresh cider requires a whole lot of apples—just one gallon of apple cider requires 36 apples.
